

GANESH YADAVA

Business Analyst | Functional Consultant | Technology & Operations

Mumbai, India | +91 8369082464 | yadavaganesh11@gmail.com | linkedin.com/in/ganesh-yadava

PROFESSIONAL SUMMARY

Analytically driven professional with a blend of software engineering experience and an MSc in Business Analytics, seeking a Functional/Operations Analyst role. Adept at bridging technology and business stakeholders - gathering and documenting functional requirements, mapping and improving business processes, analysing operational data, and translating complex technical concepts into actionable insights. Proven background in Agile delivery, KPI tracking, stakeholder communication, and cross-functional collaboration across technology transformation projects.

CORE COMPETENCIES

Business Analysis & Consulting: Requirements Gathering | Process Mapping (As-Is / To-Be) | Gap Analysis | Functional Specifications | User Stories | UAT Support | Stakeholder Management

Data & Analytics: SQL | Python | Tableau | Power BI | Excel | KPI Reporting | Predictive Analytics | Data Visualisation

Technology & Delivery: Agile / SDLC | API Integrations | Java | Kotlin | Firebase | Git | Technical Documentation | Project Lifecycle Management

PROFESSIONAL EXPERIENCE

Technical Lead & Functional Analyst

Jan 2026 – Present

Grind Gear Tech | Mumbai

- Lead functional requirements gathering sessions with cross-functional stakeholders, translating business needs into structured technical and analytical deliverables for an athlete performance analytics platform.
- Manage end-to-end project lifecycle - planning, prototyping, testing, deployment, and documentation -using Agile methodology, ensuring on-time delivery against defined KPIs.
- Produce functional specifications, process documentation, and project tracking artefacts to maintain alignment between business stakeholders and technical contributors.
- Drive iterative product improvements through analytics-led decision-making, delivering measurable enhancements to performance monitoring capabilities.

Business Consultant (Freelance)

Mar 2026 – May 2026

Satish Moto Works | Mumbai

- Conducted end-to-end operational analysis to identify process bottlenecks impacting customer flow, service conversion, and revenue generation for a client workshop.
- Performed as-is process assessment and developed data-driven to-be recommendations, delivering a structured business improvement report with KPI-backed insights.
- Proposed digital customer retention strategies using analytical insights from customer behaviour and service demand data, supporting measurable improvements in operational visibility.

Software Development Engineer

Sep 2022 – Aug 2024

Jio Platforms Limited (JPL) | Mumbai

- Collaborated with cross-functional product and engineering teams to gather and document technical and functional requirements during large-scale platform modernisation initiatives.
- Conducted application log analysis and performance diagnostics to identify operational bottlenecks and recurring stability issues - delivering a 30% improvement in application load performance and a 25% reduction in crash rates.
- Translated business objectives into scalable technical solutions, acting as a functional bridge between stakeholder requirements and engineering implementation in Agile delivery cycles.
- Enhanced development workflow efficiency through structured issue-resolution tracking and process documentation, contributing to a 15% improvement in user satisfaction scores.
- Participated in stakeholder discussions on application enhancements and user-impact improvements, building communication and requirement-management skills relevant to consulting contexts.

EDUCATION

MSc Business Analytics

2024 – 2025

National University of Ireland, Galway (NUIG) | Ireland

Relevant modules: Financial Analysis | Strategic Management | Decision Theory | Big Data (AWS) | Business Modelling | Applied Analytics

BE Information Technology

2018 – 2022

SIES Graduate School of Technology | Mumbai

CGPA: 8.74 / 10 | Relevant modules: DBMS | Data Structures | Software Engineering | Computer Networks

ANALYTICS PROJECTS

The Burden of Borrowing – FinTech Capstone

- Built end-to-end financial risk analytics solution using Python, Pandas, and Random Forest models to analyse customer borrowing behaviour and identify high-risk lending profiles across a real-world financial dataset.
- Segmented customers into three distinct behavioural personas using predictive analytics, delivering Tableau dashboards to visualise risk patterns — enabling targeted financial product recommendations and improved risk mitigation strategies.

Tesco Market Basket Analytics

- Applied association rule mining on retail transaction datasets using Python and SQL to uncover high-frequency product pairings and cross-selling opportunities, directly informing promotional bundle optimisation strategies.

Product Portfolio Optimisation

- Conducted SKU-level profitability analysis using Excel and KPI frameworks to identify underperforming product segments, delivering recommendations that supported inventory rationalisation and margin improvement.

CERTIFICATIONS & ACHIEVEMENTS

- Programming Foundations: Databases (SQL) | Data Structures | Git Essential Training
- Runner-up, Smart India Hackathon 2019 - national-level innovation competition.
- Increased fundraising donation inflow by 40% through digital outreach strategy design at Youth Empowerment Foundation.
